

Description	
Job Title	Clinical Scientist
Reports to Title	Director Clinical Science
General Accountability	<p>Our mission is to Profoundly change the standard of care by creating a tomorrow where clinicians can confidently ablate tissue with precision; a tomorrow where patients have access to safe and effective treatment options, so they can quickly return to their daily lives. Changing the standard of care is part of our fabric. We are a group of energetic, problem-solvers focused on innovation, and looking to change the world. We are changing the paradigm for treating diseases such as prostate cancer by using real-time MR Imaging, thermal ultrasound and close-loop temperature feedback control, to gently ablate the diseased tissue with minimal side effects.</p> <p>If you share our values and want to work in a collaborative results focused culture and want to make a Profound impact in healthcare and your career, here is your chance.</p> <p>Key contributor to the clinical adoption team. Manage, educate and foster strong relationships with existing and new KOL's (key opinion leaders) and/or CoE's (center of excellence) in line with the corporate strategies.</p> <p>Key member of the clinical SWAT team. Provide clinical and technical input during product development, and help demonstrate feasibility of new features. Work with alpha and beta sites to evaluate new software features and hardware improvements. Design and delivery of TULSA product training with focus on physician value, patient value and clinical adoption.</p> <p><i>Must have valid passport and willingness to travel extensively globally, with a focus in the United States (up to 60%).</i></p>
